

Growing Demand for Healthcare Workers in New Jersey

New Jersey has faced several healthcare worker shortages for years, and the coronavirus pandemic has only exacerbated these needs. In 2015, there were about 10 open healthcare jobs for every unemployed worker in the United States. By 2018, even before the coronavirus outbreak, this number had risen by more than 30 percent, with 13 open jobs for every unemployed healthcare worker. As states brace for a second wave of coronavirus infections, addressing these shortages will become even more critical.

In New Jersey, the demand for healthcare workers in general has grown. In 2018, there were 11.0 open healthcare jobs for every available unemployed healthcare worker in the state, an increase from 10.6 in 2015.

However, the demand is much higher for high-skilled healthcare workers, called healthcare practitioners (including doctors, specialists, registered nurses, etc.), in New Jersey.

In 2018, the ratio was...

22.3 to 1 open healthcare practitioner jobs for each available healthcare practitioner who was unemployed.

Even as New Jersey faces these shortages, demand for healthcare workers is growing. Despite record levels of job losses in other sectors in the wake of the coronavirus outbreak, the number of open healthcare jobs increased from March 1, 2020 to May 31, 2020 compared to the same period last year.

From March-May 2020, there were

32,776 new open healthcare jobs in New Jersey.

This is an increase of

+17.9% over the same period in 2019.
