In 2019, 229,700 commuters worked in Mercer County. Of these, 23.8% or 54,600 commuters, were foreign-born.

The top five countries of origin for immigrants living in Mercer County were:
- India (16.6%)
- China (6.4%)
- Guatemala (12.0%)
- Haiti (4.9%)
- Ecuador (3.7%)

In 2019, 20,600 immigrants living in Mercer County had limited English language proficiency, making up 24.4% of the immigrant population.

Among the limited English language proficiency population, the top languages spoken at home other than English were:
- Spanish (68.5%)
- Chinese (6.0%)
- Polish (3.6%)
- Gujarati (2.4%)

Spending Power & Tax Contributions

Given their income, immigrants contributed significantly to state and local taxes, including property, sales, and excise taxes.

In 2019, immigrant households in Mercer County earned $4.2 billion

- $916.4 million went to federal taxes
- $415.9 million went to state & local taxes
- $2.8 billion left in spending power

Foreign-born households held 28.6% of all spending power in Mercer County.

3 Totals may not add up to 100 percent due to rounding.
**Spending Power & Tax Contributions continued**

In 2019, foreign-born residents in Mercer County contributed $11.5 billion to the county’s GDP, or 31.8% of the total. Immigrants in Mercer County also supported federal social programs. In 2019, they contributed $373.6 million to Social Security, $111.3 million to Medicare.

22.8% of immigrants in Mercer County received Medicare or Medicaid, compared with 34.0% of U.S.-born residents in 2019.

**Private Healthcare Coverage**

About 64.4% of immigrants had private healthcare coverage, while 75.1% of U.S.-born had private healthcare coverage.

**Public Healthcare Coverage**

About 22.8% of immigrants had public healthcare coverage, while 34.3% of U.S.-born had public healthcare coverage.

**Poverty Threshold**

Looking at their household incomes, 19.9% of immigrants live at or below 150% of the federal poverty threshold as compared to 18.4% of U.S-born residents.

**Workforce**

Although the foreign-born made up 23.1% of Mercer County’s overall population, they represented 28.8% of its working-age population, 30.7% of its employed labor force, and 49.1% of its STEM workers in 2019. The immigrant working-age population was 49.3% female and 50.7% male. The employed immigrant population was 41.7% female and 58.3% male.

6 These figures derive from our calculations based on immigrants’ share of wage income and self-employment income in the 5-year ACS sample from 2019 and the statistics of GDP from the U.S. Bureau of Economic Analysis.

7 Including people who have both public and private healthcare coverage.

8 STEM refers to occupations that require background or expertise in Science, Technology, Engineering, and/or Math.
Workforce continued

In 2019, there were 17 open STEM job postings for every available unemployed STEM worker in Mercer County. Immigrants played a critical role in several key industries in Mercer County. Here are the percentages of immigrant workers in these industries:

Due to the role immigrants play in the workforce, helping companies keep jobs on U.S. soil, we estimate that immigrants living in Mercer County had helped create or preserve 3,900 manufacturing jobs that would have otherwise vanished or moved elsewhere by 2019.13

---

14 Data is obtained from Burning Glass Technologies for the time period between April 1, 2020 and March 31, 2021.
Entrepreneurship

Despite making up **23.1%** of the population, immigrants made up **37.5%** of the business owners in Mercer County in 2019.

While **6.3%** of the U.S.-born population were entrepreneurs, **8.6%** of foreign-born residents worked for their own businesses.

**4,700** immigrant entrepreneurs generated **$144.2** million in business income for Mercer County in 2019.

Immigrant entrepreneurs self-identified as **44.6%** female and **55.4%** male.

Immigrant entrepreneurs by race and ethnicity:
- Hispanic: **38.6%**
- White: **29.0%**
- Asian American or Pacific Islander: **24.8%**
- Other Groups: **7.6%**

Immigrant entrepreneurs tended to work in these **key industries**: Professional Services (38.6%), General Services (15.1%), Construction (13.4%), Other Industries (32.9%).

15 Because of limitations with small sample size, we are unable to provide estimates for other racial and ethnic groups, including Black or African American, mixed race, and other races and ethnicities.

**SPOTLIGHT ON** Small Business Recovery from the Pandemic

While all Americans are struggling to adapt to their new reality in a time of economic shutdown, entrepreneurs within particularly vulnerable industries in the metro area face severe challenges posed by the COVID-19 crisis.

**4,100** entrepreneurs in professional and business services, **45.0%** being immigrants.
**Education**

The share of immigrants with post-secondary education has increased in recent years.

Share of Mercer County’s population aged 25 or above that held a bachelor’s degree or higher in 2019:

- 41.3% of U.S.-born
- 45.6% of immigrants

Share of Mercer County’s population aged 25 or above that held only a bachelor’s degree in 2019:

- 23.1% of U.S.-born
  - 53.6% female
  - 46.4% male

- 19.1% of immigrants
  - 56.6% female
  - 43.4% male

Share of Mercer County’s population aged 25 or above that held an advanced degree in 2019:

- 18.2% of U.S.-born
  - 51.8% female
  - 48.2% male

- 26.5% of immigrants
  - 43.3% female
  - 56.7% male

9.5% of K-12 students were foreign-born in 2019.

**SPOTLIGHT ON University Population**

2,594 students enrolled in colleges and universities in Mercer County in fall 2019 were not U.S. citizens or permanent residents.16

1,227 students were undergraduates, with 45.6% being female.

1,367 students were graduate students, with 37.7% being female.

International students made up 23.1% of the student body at Princeton University, which ranked 131st nationally when it comes to the share of international students.17

---

16 Data on total student enrollment in the county is derived from the Integrated Postsecondary Education Data System maintained by the National Center for Education Statistics.

17 Among U.S. colleges and universities that participate in federal aid programs.
Education continued

SPOTLIGHT ON University Population Continued

367 international students graduated with STEM degrees from colleges and universities in Mercer County in the 2018-19 academic year.

1,753 jobs in higher education and other areas including accommodations, food, and transportation were supported by international students.

$142.5 million was spent by international students in the 2019-20 academic year.¹⁸

Immigrants made up 32.7% of all workers in colleges, universities, and professional schools in 2019.

Housing

In 2019, 56.1% of immigrant households in Mercer County owned their own homes, compared to 65.0% of U.S.-born households.

The total property value of immigrant households was $8.5 billion.

43.9% of immigrant households were renters. Their total annual rent paid was $218.3 million.

88.0% of immigrant households in Mercer County had access to broadband connection in their place of residence as compared to 90.2% of U.S.-born households in 2019.

Naturalization

Immigrants who were not eligible to become naturalized U.S. citizens are either because they have not met certain requirements such as residency, English proficiency, or age, or because they are undocumented.

45.5% Naturalized Citizens (38,700)

15.8% Likely Eligible to Naturalize (13,400)

38.7% Not Eligible to Naturalize (32,900)

¹⁸ Economic data is derived from the International Student Economic Value Tool maintained by NAFSA, the association of international educators.
Naturalization continued

If all immigrants who are eligible to naturalize became U.S. citizens, their earning potential would increase by +8.9%.

Nationally, 48.7% of immigrants are naturalized citizens, 15.9% are likely eligible to naturalize, and 35.4% are not yet eligible.

Refugees

2,900

refugees, or 3.5% of the foreign-born population, were likely refugees.

Top countries of origin for the refugee population in Mercer County were Liberia (35.8%) and Poland (19.0%).

In 2019, refugee households earned

$153.6 million

$33.8 million went to federal taxes

$15.4 million went to state & local taxes

$104.3 million left in spending power

About 34.4% of refugees held at least a bachelor’s degree...

...and about 16.2% held an advanced degree.

Refugees tended to work in Healthcare & Social Assistance:

About 72.6% of refugees in the area were naturalized U.S. citizens.

About 30.1% of the refugee population

Shing-Fu Hsueh
Former Mayor of West Windsor

Shing-Fu Hsueh (pronounced “Shay”) came to New Jersey from Taiwan in 1969 with $300 in his pocket and a heavy accent that required help from a speech therapist. Despite these challenges, he went on to become a successful environmental engineer, professor, and a four-term Mayor of West Windsor. “The United States gave me opportunities I would never have imagined,” he says. “Our country truly allowed me to fulfill my American Dream.”

Hsueh graduated from Rutgers in 1975 with two master’s degrees and a PhD in chemical engineering. He married his longtime sweetheart, Sue, in Taiwan and then returned to begin a 28-year career as an engineer at the New Jersey Department of Environmental Protection. At the NJDEP, Hsueh helped forge the state’s first clean-water initiatives, and helped tackle flooding and pollution all across the state. “I was fresh out of school, but I had a PhD so they assumed I could deal with anything,” he recalls.

After growing up under martial law in Taiwan, Hsueh loved America’s vibrant democracy, and relished the chance to get involved in public service. He was elected to the West Windsor Council in 1993, swiftly becoming Council President, then elected Mayor in 2001, retiring from the NJDEP the following year to throw himself into his theoretically part-time leadership role.

As Mayor, Hsueh created West Windsor’s first art center in 2009, and raised over $900,000 to double the size of the town’s senior center. He worked with nonprofit groups to create new sporting fields and Little League facilities. Hsueh helped restore hundreds of acres of local parkland and scenic waterways, preserved 1,000 acres of local farmland, and established West Windsor’s farmer’s market, now one of the country’s top-ranked markets.

Over the years, West Windsor has grown more diverse: the Asian population has risen to over 40%, up from 15% when Hsueh first took office. As one of New Jersey’s first elected officials of Asian descent, Hsueh hopes his example will inspire other immigrants to serve their communities. “When I was a kid in Taiwan, I dreamed of having this sort of opportunity,” he says. “It’s been such an honor to spend my career trying to help the people of West Windsor.”

Al Maghazehe came to the United States as an international student in 1977, but when the Iranian Revolution broke out a year later, he realized he couldn’t safely return home.

Raised in a tight-knit family, Maghazehe struggled with loneliness at first, but finished a master’s degree in health administration at Wagner College, got a PhD in business administration, and secured an administrative position at Trenton’s Helene Fuld Medical Center. In Mercer County, he received support from his employer as he obtained his green card, and found the local community incredibly welcoming. “I feel like I grew up in Trenton,” he says. “Mercer County has given me everything I have.”

Maghazehe went on to become a citizen, and has brought his parents and in-laws to Mercer County too. “Having to leave Iran was a very difficult situation, and I went through some very tough times,” he recalls. “But I found amazing opportunities here, and got the help I needed to reunite my family.”

Rising through the ranks, Maghazehe eventually became CEO and presided over the 1998 merger that created Capital Health, now a regional healthcare powerhouse with almost a billion dollars in annual revenue. In 2009, he secured $756 million in federal support — the largest grant of its kind ever issued — to build a new state-of-the-art 233-bed hospital in Hopewell, transforming Capital Health into a major regional healthcare system. “I’m very proud of our accomplishments,” he says.

Capital Health’s headcount has more than doubled on Maghazehe’s watch, and the organization now employs around 4,500 people. The system provides outpatient care for around 26,000 people each month, and admits around 2,400 patients, drawing both patients and specialists from across New Jersey and Pennsylvania.

Capital Health has also played a vital role during the pandemic, with COVID-19 patients filling hundreds of its hospital beds. Under Maghazehe’s leadership, Capital Health established new COVID-19 treatment and testing facilities, and is now partnering with state officials to run the region’s largest vaccination site at Trenton’s Cure Insurance Arena.

Helping central New Jersey to weather the pandemic is deeply meaningful to Maghazehe, who has never forgotten the way the region welcomed him and gave him a safe place to raise his children. “I don’t have the words to say how grateful I am that I’ve been able to stay here and serve this community,” he says. “I was given an incredible opportunity, and I’ve tried to do everything I can to give something back to my new home.”
New Americans in Mercer County

DACA-Eligible Population

2,500
DACA-eligible people lived in Mercer County, in 2019.

They made up 2.9% of the foreign-born population.

In 2019, DACA-eligible households earned $46.4 million:
- $5.7 million went to federal taxes
- $4.1 million went to state & local taxes
- $36.5 million left in spending power

Undocumented Immigrants

24,300
Undocumented immigrants lived in Mercer County in 2019.

They made up 28.6% of the foreign-born population in Mercer County in 2019.

The top five countries of origin for undocumented immigrants were:
- Guatemala (24.1%)
- India (14.1%)
- Mexico (7.3%)
- Ecuador (5.6%)
- Haiti (5.4%)

Undocumented immigrants are highly active in the labor force. More than 88.3% are of working-age in Mercer County.

Undocumented immigrants by age groups:
